

FIELD ENGINEER CHECKLIST FOR CHOPTANK FIBER

- ___ NID / demarcation box to be installed on exterior of home.
- ___ Fiber will enter the home directly through the wall, not through foundation or under house.
- ___ ONT to be installed on inside of exterior wall, directly opposite NID.
- ___ Wi-Fi extender may be needed to boost signal.
- ___ It is Applicant's responsibility to expose private utilities (e.g., water, septic, electric, propane, satellite, pet fences) in the proposed fiber path. Applicant must initial one of the following:
 - _____ Applicant has confirmed there are no private utilities in the proposed fiber path, OR
 - _____ Applicant will expose all private utilities in the proposed fiber path.

NOTE: Choptank does NOT notify property owners of when drop installation will occur. Private lines need to be exposed ASAP.
